week of April 22, every update is on Wednesdays!

KUPUEV TIMES

Quote of the week: "It didn't take guts to follow the crowd, that courage and intelligence lay in being willing to be different." — Jackie Robinson

Peer Advice

Tiramisu is a student at Kupuev Academy. They know just right how tuff it sometimes is to study here. So they were eager to share some advice with you! They were a contestant in an Olympiad, and their SAT score is 1400+, so you cannot dismiss Tiramisu's words!

Peer Advice 1.1:

something Tiramisu wish they knew before:

You are not going to magically achieve your goals just by daydreaming about them! Starting small is a big step into your future. Usually, 5 minutes is enough to get you into the right flow. The hardest part is just starting.

Peer Advice 1.2:

Tiramisu about wanting to quit: **As a rule, I want to drop everything 1/2 week before any major event. But somehow before the deadline I find this weirdly calm. I tell myself that no matter the outcome, experience is experience. There's really no harm in just trying.**

Peer Advice 1.3:

Tiramisu about environment(It's crucial!): **Well, if you're experiencing that need to distance yourself from certain circles, then don't hesitate. try to weigh the situation, predict the worst-case outcomes, and then just step away. Luckily, my current friends are the best - they keep me motivated and grounded!**

Last, but not least, 1.4:

Facing THE Fear of failure!: **I try to remember that we're all human. why worry so much about what others think? most people will forget about your "failure" in ten minutes anyway - they're too busy worrying about themselves**

Vocab & Phrases

Ineffable — too great to describe in words
Example: The view from the mountain was ineffable.
Petrichor — the pleasant smell after rain
Example: I love the petrichor after a summer storm.
Get out of hand (to become uncontrollable)
Example: The situation got out of hand.
Pull someone's leg (to joke with someone or trick them in a friendly way)
Example: Relax, I'm just pulling your leg.
Break a leg (a way to wish someone good luck)
Example: Break a leg on stage tonight.

Dream beyond limits

Gaming strategy: where do your talents lead you?

The Four Horsemen of International Admission are your **GPA, Extracurriculars, Language Certificate, and Personal Statement.** That's common knowledge here at Kupuev, right? What is more interesting is that the ratio of the documents vary depending on which country you apply.

USA uses **Holistic Review** for student applications. A holistic review is a way of analyzing an application as a whole (whole becomes hole).

- Main Focus: **Personal Brand.** They mainly value your essays and your own story/voice.
- Document consideration ratio: 30% GPA, 40% personal achievements, 30% essays and recs.

UK values **Academic Depth**. Your interest in one subject can show itself here.

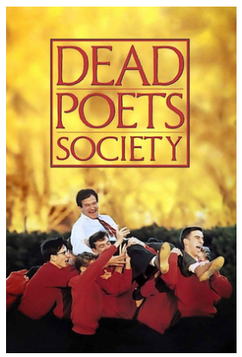

- Main Focus: **Super-curriculars.** It's the same exc-s but strictly based on one thing. Olympiads, specialized courses, scientific books read. In a motivation letter (UCAS Personal Statement), 80% of the text should be about love for the subject.
- Document consideration ratio: 70% grades and test scores, 25% profile achievements, 5% usual exc-s

Germany and Czechia is for **pure excellent students** who also **know the language** of the country they're applying to .

- Main Focus: **GPA & Language Proficiency.** They probably won't even look at your volunteering or hobby.
- Document consideration ratio: 90% grades, 10% knowledge of the language

Cultural Impact

Movie: Dead Poets Society (1989)
This film turned the Latin phrase "Carpe Diem" (Seize the Day) into a global manifesto for teenagers. The story of inspiring English teacher John Keating teaches students to *find their own voice instead of blindly following school curriculum, strict rules, and parental expectations.*

The movie shattered the image of school as a *"grade factory."* It sparked a worldwide wave of youth literary clubs and creative underground societies. Dead Poets Society reminds us that *while medicine or law are noble pursuits, poetry, beauty, and love are what we stay alive for.*

Unusual Trivia

Did you know that :

- Bananas are radioactive. They contain potassium, including a naturally occurring radioactive isotope. This makes them slightly radioactive, but the level of radiation is extremely low and completely harmless to humans. In fact, you would have to eat an absurd amount of bananas for it to have any negative effect on your body.
- Honey is one of the very few foods that can last indefinitely without going bad. Its chemical composition prevents bacteria from growing inside it. Archaeologists have even found pots of honey in ancient Egyptian tombs that were still safe to eat after thousands of years..
- The average person has 67 different species of bacteria in their belly button.
- The largest piece of fossilised dinosaur poo discovered is over 30cm long and over two litres in volume.

Food for Thought

MBTI (Myers–Briggs Type Indicator) is a system that describes personality by looking at how people get energy, take in information, make decisions, and organize their life.
It uses four pairs of preferences, and your choices form a 4-letter type (like INFP or ESTJ).
What each letter means:

1. E / I — Energy
- **E (Extraversion): you get energy from people, activity, and the outside world**
- **I (Introversion): you get energy from being alone and your inner thoughts**

2. S / N — Information
- **S (Sensing): you focus on facts, details, and real things you can see**
- **N (Intuition): you focus on ideas, patterns, and possibilities**

3. T / F — Decisions
- **T (Thinking): you make decisions using logic and objective analysis**
- **F (Feeling): you make decisions based on emotions and values**

4. J / P — Lifestyle
- **J (Judging): you like plans, structure, and clear decisions**
- **P (Perceiving): you prefer flexibility, spontaneity, and keeping options open.**

Interesting MBTI statistics:

Most common MBTI type:
ISFJ — known as caring, responsible, and supportive

Most creative/imaginative:
INFP, ENFP — known for ideas and imagination

Rarest type:
INFJ — often described as thoughtful, deep, and idealistic

Most organized:
ISTJ, ESTJ — like structure, rules, and planning

Most caring types:
ISFJ, ESFJ, ENFJ, INFJ — they focus on people and emotions

Most spontaneous/fun-loving:
ESFP, ENFP — enjoy living in the moment

Most logical types:
INTJ, INTP, ISTJ — strong in analysis and critical thinking
